Subject: PARIS MOU, TOKYO MOU ANNOUNCE CIC ON ECDIS

Refer to: Ship Owners / Managers / Operators/ Auditors

The Paris Memorandum of Understanding (MoU) has announced that it will be conducting a concentrated inspection campaign (CIC) jointly with the Tokyo MoU.

The CIC will focus on navigation safety, including Electronic Chart

Display Information Systems (ECDIS). The Black Sea MoU will also participate in same CIC campaign.

The campaign will be held for three months, beginning 01 September 2017 through 30 November 2017. During this time, Port State Control (PSC)

Officers are expected to use a standard questionnaire, which will be published in August 2017.

The new CIC was announced during Paris MoU 35th anniversary meeting in Poland, where many issues were discussed. Also, the methodology for calculating flag and recognized organization (RO) performance, used for the targeting of ships for inspection, is being reviewed.

The Committee agreed to move towards a new scheme to replace the current White-Grey-Black List and RO performance List in the near future.

During the meeting, high importance was given to the report of the Concentrated Inspection Campaign (CIC) on MLC, 2006. The CIC was carried out from September to November 2016. The general conclusion was that the results show a proper implementation of the MLC requirements on board the ships inspected, and compliance on the MLC areas focused on in the questionnaire.

The Committee adopted the 2016 Annual Report, including the White, Grey and Black List and the performance list of recognized organizations and informed that the lists will be published in early June and used for targeting purposes from 1 July 2017. Moreover, the Annual Report will be published by the end of July this year.

Paris MoU said that the number of ships which have been refused access to the region after multiple detentions has increased from 11 to 20.

Five ships have been refused access for the second time. This demonstrates the effectiveness of the New Inspection Regime. The Committee noted that the detention percentage has increased from 3.3% to 3.8%.

Please make necessary arrangements in order to comply with the above mentioned inspections.

Best regards
